International production and sales locations

Business units

TYROLIT offers its customers cost-efficient and "green" solutions in four business units. Moreover, with its global sales network and a team of experienced application engineers, TYROLIT provides top-quality service.

Metal and Precision

From precision machining in the engine and gear industry to the production of cut-off wheels with diameters up to 2,000 mm for the steel industry – the TYROLIT product range in the Metal and Precision business unit includes high-tech tools for a huge variety of applications. In addition, TYROLIT offers customised complete solutions for specific individual requirements.

Industrial Trade

Thanks to its global sales network, in addition to premium product solutions in the three core areas of cutting, grinding and finishing, the Industrial Trade business unit guarantees truly customer-focused marketing support. Continuous, pioneering innovations make a decisive contribution to the success of our customers around the globe.

Construction

In the Construction business unit TYROLIT is a leading system supplier of sophisticated drilling systems, wall and wire saws, floor saws and for grinding uneven surfaces such as motorways made of concrete. For special projects (e.g. offshore work, decommissioning of nuclear power stations) TYROLIT offers customised machine tool combinations. In this way, customers always obtain the ideal solution for working with concrete.

Stone – Ceramics – Glass

Our customised diamond tools and grinding solutions in the Stone – Ceramics – Glass business unit cannot fail to impress through their exceptional performance and quality. For the most exacting customer requirements, TYROLIT offers numerous products for cutting, calibrating, polishing and truing natural and artificial stone, as well as ceramic and glass materials.

Family-run company since 1919

As a member of the dynamic Swarovski Group, TYROLIT enjoys the independence of successfully achieving long-term corporate goals.

At TYROLIT, we strive to delight internal and external target groups and to achieve a fair, lasting partnership-based cooperation with them. To this aim, we are continually optimising and improving the quality of our products and services, and constantly adapting business processes to the changing demands of the market.

Investment in research and development, in training our employees and in technological improvements are an essential part of the TYROLIT management policy. The implementation of a global supply chain management ensures on-time deliveries for our customers worldwide.

Since 1919, the sustainable handling of resources, the assurance of a safe working environment and compliance with legal requirements have contributed to the company's lasting positive business development.
